be convenient for global analysis. We emphasize that hyperboloidal foliations were used by Friedrich [11,12] in order to establish the stability of Minkowski space in the future of a hyperboloidal hypersur-face. Hyperboloidal foliations have also been found to be very efficient in numerical computations [10,29,30,34].

The stability of Minkowski space result for the vacuum Einstein equations is then appealed to for the remaining regions. Contents 1. Introduction 2 1.1. The Uncoupled Problem 4 1.2.
