Following an outline of the technology involved in preparing casts and the types of casts made, this atlas devotes a whole section to three blood vessel systems as well as the biliary system. Apart from normal anatomy, it presents all other major structural variations together with the liver blood vessel structures and bile ducts of each liver segment.

The Atlas begins with the brief description of the types of surgical access, liver mobilization, hilar dissection, and hepatic-vein control. Subsequent chapters and subchapters deal with the single stages and operative techniques of different liver resections such as monosegmentectomies, bisegmentectomies, multisegmentectomies, hemihepatectomies, and trisectionectomies.
