The concept of a link between creativity and mental illness has been extensively discussed and studied by psychologists and other researchers for centuries. Parallels can be drawn to connect creativity to major mental disorders including: bipolar disorder, schizophrenia, major depressive disorder, anxiety disorder, and ADHD. For example, studies [which?] have demonstrated correlations between ...

Diagnosis. The ICD-10 is used around the world to diagnose people with illnesses like depression. According to the ICD-10, for a person to be diagnosed with depression, their symptoms have to last for at least two weeks. The symptoms must happen every day, or almost every day. These symptoms also have to cause problems in a person's life (like their work life, family life, social life, or ...
